

Thought Experiment

"The Laboratory is in your Head"

Puzzling Relations

A man named *George* was hurrying to get ready for a dinner party when Dan rang his doorbell.

"I'm just rushing off to a dinner party," said *George*, "but I'm sure it would be fine if you came along."

So the two went off together. When they arrived at the party, *George*, who always enjoyed getting people to use their heads, introduced Dan to the other guests with the following rhyme:

*"Brothers and sisters have I none,
But this man's father is my father's son."*

How were *George* and Dan related? Explain your reasoning.
